

# Alireza Farokhi

## Software Engineer

I am a seasoned software engineer driven by a relentless passion for innovation. My journey in web development has not only equipped me with a deep understanding of the field but also honed my problem-solving skills. Collaborative by nature, I thrive in team environments, consistently delivering results that exceed expectations. My commitment to personal growth is unwavering, as I continuously enhance both my technical and interpersonal skills. I am excited to reflect on my career achievements and look forward to new opportunities to pioneer innovative web solutions.

## Key Competencies

Java	Spring	PostgreSQL	Team leadership
JavaScript	Vue.js	MySQL	Mentorship
PHP	Laravel	MongoDB	Problem-Solving

## Professional Experience

### QUANT NETWORK | Sep 2021 - Present

In my role at Quant Network LTD, I have significantly contributed to the development of interactive web applications for Overledger, the company's flagship product. My work involved using advanced technologies such as Java/Spring Boot, Vue.js, Node.js, microservices, and the PHP framework Laravel. My primary focus was on facilitating blockchain developers and enterprise companies in utilizing Overledger APIs. At Quant, our aim is to make blockchain technology accessible and beneficial for all, focusing on creating interoperable ecosystems that are efficient, cost-effective, and risk-averse. My key responsibilities revolved around this central objective.

#### Full Stack Software Engineer

- Architected interactive web apps for the groundbreaking Overledger product.
- Leveraged Java/Spring Boot, JavaScript (Vue.js, Node.js), microservices, and Laravel.
- Empowered blockchain developers and enterprises to seamlessly access Overledger APIs.
- Pioneering blockchain's transformative potential, lowering costs, and mitigating risks.

#### Software Developer

- Developed robust microservices focusing on user and role management.
- Designed and implemented scalable application management features.
- Contributed to the development of subscription management functionality, aimed at improving user experiences.
- Designed and developed user journeys for smart contract token deployments and bridges.

### ADA | Jan 2021 - Aug 2021

During my tenure at Asre Danesh Afzar, I spearheaded web solutions for diverse industries, including IT training, e-banking, and app development. My contributions included:

#### Software Developer

- Engineered high-impact web applications for a diverse IT firm.
- Expertly wielded PHP, Laravel, MySQL, and Redis to deliver top-tier results.

## **NOBAAR** | Jul 2019 - Jan 2021

At Nobaar, as a technical co-founder, I built the first startup to transform the logistics industry in Iran as a Backend Developer and engineering team lead. My achievements included:

### **Technical Co-Founder and Team Lead**

- initiating and leading the development of Iran's first transformative startup in the logistics sector, setting a precedent in the industry.
- As the engineering team leader, I was instrumental in shaping the team's strategic direction and fostering a culture of innovation and excellence.
- Drove the design and implementation of APIs and application logic, laying the foundational technological framework for the startup.
- Established and led a dynamic, skilled engineering team, guiding them through complex project lifecycles and ensuring the successful execution of key deliverables.
- Orchestrated cross-functional collaboration, aligning the efforts of the tech team with business goals, which was vital in positioning Nobaar as a leader in the logistics domain.

## **IQSTUDIO** | Mar 2016 - Jun 2021

My professional path started at iQStudio, where I was part of a freelance web development team. Key accomplishments from this experience include:

### **Web Developer**

- Excelled in a versatile freelance environment, leading the development of web projects for a variety of industry sectors.
- Specialized in the creation of advanced web applications, consistently achieving outstanding outcomes.

## Education

---

### **Islamic Azad University** - 2010 - 2015

- Bachelor's degree, Information Technology

### **licenses & certifications**

- Front End Libraries - freeCodeCamp
